### Library Catchment Profile

For organisations wishing to submit an Application to manage Sinfin Library

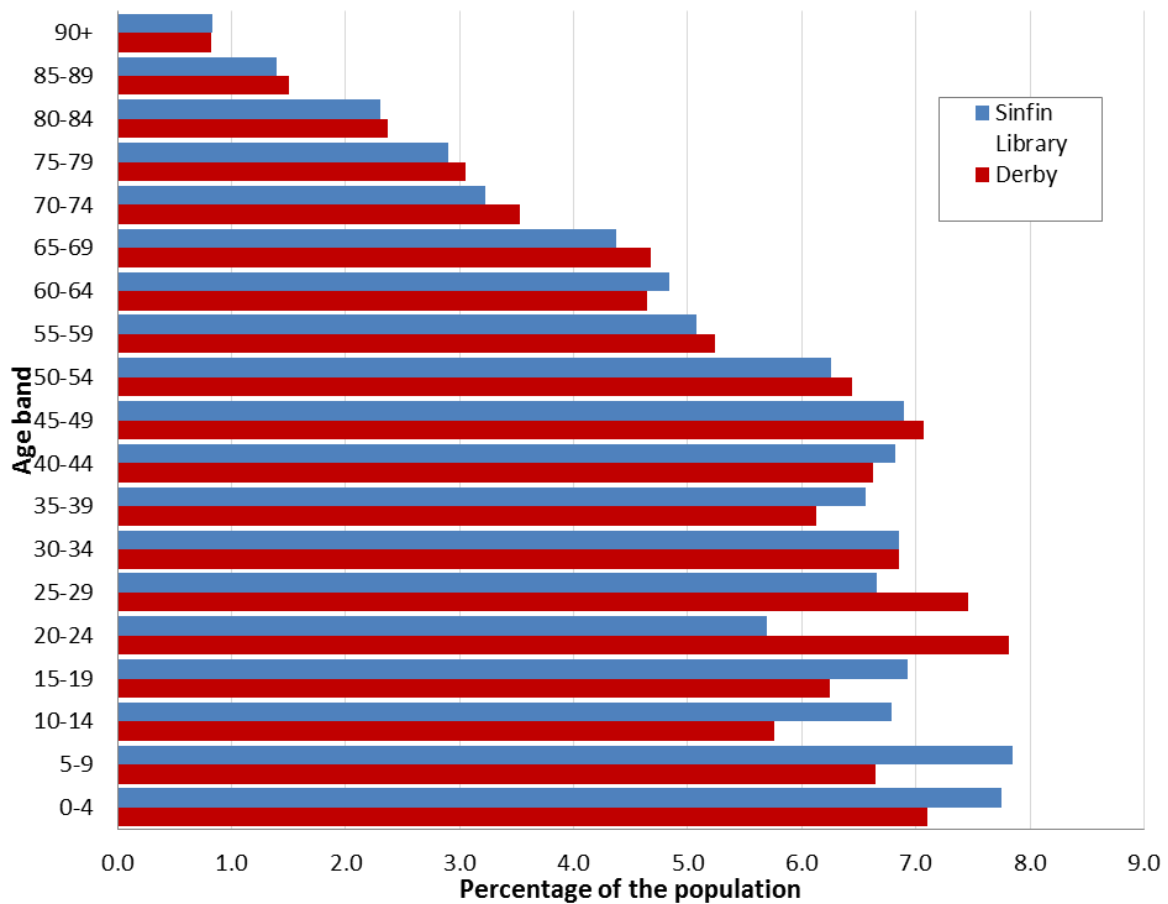

V1 4 September 2017

## Demography

The Sinfin Library catchment contains approximately 17,000 households and covers a population of approximately 44,700<sup>1</sup> Derby residents, or approximately 17.7% of Derby's population<sup>2</sup>.

Of the resident population, 48.8% are male and 51.2% are female<sup>2</sup>. This is a slightly higher female population than the Derby average of 50.5%<sup>2</sup>.

**Figure 1 – Comparative age profile of the Sinfin Library catchment, 2014<sup>2</sup>**

As illustrated in Figure 1, the population within the Sinfin Library catchment has a slightly younger profile than the Derby average<sup>2</sup>. When compared to the Derby profile, it is evident that a greater percentage of the population in the Sinfin Library

<sup>1</sup> Derived from Office for National Statistics, Mid-year estimate of population, 2014 (household figure via Experian Ltd, Mosaic Public Sector, 2015) .

<sup>2</sup> Please note, libraries serve not only Derby residents but people who work in, go to school/college/university in, shop in and visit Derby. However, whilst some library catchments extend beyond the city boundary, the demographic and socio-economic information included in this profile only relates to Derby residents living within the library catchment.

catchment is aged below 20 years. Correspondingly, whilst the shape of the pyramid is similar, the percentage of the catchment population aged over 45 years is slightly smaller than the Derby average in all age bands.

Further information on age is set out in Tables 1 and 2 below:

Library Catchment Areas where older population is 20% or more above Derby average.

In 2011, 40.8% of the Sinfin Library catchment population<sup>3</sup> were from Black and Minority Ethnic, BME<sup>4</sup>, groups compared to 24.7% of Derby's population.

**Figure 2, Comparative ethnicity profile of the Sinfin Library catchment, 2011<sup>4</sup>**

As illustrated in Figure 2, the Sinfin Library catchment had a higher percentage of people from Asian, Black and Dual Heritage groups than the Derby population. Notably, the percentage of people from Indian (12.2%), Pakistani (8.2%) and Black Caribbean (2.8%) communities was significantly higher than the Derby population (Indian – 4.4%, Pakistani – 5.9%, Black Caribbean – 1.4%).

Further information on ethnicity is set out in Table 3 below:

## Deprivation

Ranking the library catchments according to their level of comparative deprivation, the Sinfin Library catchment is the seventh most deprived within the city – this is identified in Table 4.

Comparing the catchment's (population weighted for the purposes of compiling this profile only) average score to the Local Super Output Area (LSOA) scores which comprise the Index of Multiple Deprivation (2015), the Sinfin Library catchment would fall within the 30% most deprived areas within England.

**Table 4, Comparative levels of deprivation between library catchments, 2015<sup>5</sup>**

Library Catchment	Index of Multiple Deprivation average score
Pear Tree Library	49.48
Allenton Library	41.63

## Financial Deprivation

The mean household income in the Sinfin Library catchment is approximately £31,850<sup>6</sup> - this is slightly higher than the £31,100 mean household income for Derby overall.

Accordingly, the income profile for the Sinfin Library catchment is very similar to the income profile of Derby – this is illustrated in Figure 3. Significantly, whilst the mean household income within the catchment is higher than the Derby average, a slightly greater percentage of households within the catchment have an annual income below £25,000 than within Derby overall (45.5% compared to 43.6%).

**Figure 3, Comparative profile of household income within the Sinfin Library catchment, 2015<sup>6</sup>**

## Economy and Employment

Ranking the library catchments according to their comparative level of employment deprivation, the Sinfin Library catchment is the fifth most deprived within the city – this is identified in Table 5<sup>7</sup>. Approximately 16.3% of the working age population living in this catchment are classed as being involuntarily excluded from the labour market<sup>8</sup> compared to 14.3% of working age people living in Derby.

Comparing the catchment's (population weighted for the purposes of compiling this profile only) average score to the LSOA scores which comprise the Employment Deprivation Domain (2015), the Sinfin Library catchment would fall within the 30% most deprived areas within England.

**Table 5, Comparative levels of employment deprivation between library catchments, 2015<sup>7</sup>**

<sup>8</sup> This includes people who would like to work but are unable to do so due to unemployment, sickness or disability, or caring responsibilities.

## Health and Disability

Ranking the library catchments according to their comparative level of health deprivation and disability, the Sinfin Library catchment is the eighth most deprived within the city – this is identified in Table 6<sup>9</sup>.

Comparing the catchment's (population weighted for the purposes of compiling this profile only) average score to the LSOA scores which comprise the Health Deprivation and Disability Domain (2015), the Sinfin Library catchment would fall within the 40% most deprived areas within England.

Further information on health is set out in Table 7 below:

<sup>9</sup> DCLG, English Indices of Deprivation, Health Deprivation and Disability Domain, 2015 - the Health Deprivation and Disability Domain measures the risk of premature death and the impairment of quality of life through poor physical or mental health. The domain measures morbidity, disability and premature mortality but not aspects of behaviour or environment that may be predictive of future health deprivation.

## Lifestyle

As illustrated in Figure 4, the level of technology owned (or accessed) by adults within the Sinfin Library catchment is slightly higher than that within Derby overall<sup>11</sup>.

**Figure 4, Comparative profile of technology ownership within the Sinfin Library catchment, 2015<sup>11</sup>**

The level of internet access by adults living in the Sinfin Library catchment is however lower than that across the adult population of Derby – this is identified in Table 8<sup>12</sup>. Notably, 34.8% of the adult population within the catchment have no access to the internet.

<sup>11</sup> Experian Ltd, Mosaic Public Sector, 2015 – please note, figures will sum to more than 100% as people can own/access more than one type of technology.
